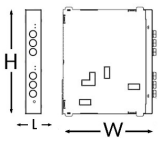
Circuit manager MCL-C

A device that controls the operation of output circuits. Depending on the operating mode, it switches on the appropriate type of voltage (AC or DC), controls the monitored CBM luminaires, performs DC current measurements and activates the modified mode.

» number of electrical circuits: 2
» maximum load of each circiut: 3 A
» ground fault detection
» internal faut detection

ATTRIBUTES

Category	**systems**
Application	**central battery**
Compatible with	**TM-CB M**

DIMENSIONS


Net dimensions **L x W x H** [±2 mm]	**27 mm x 157 mm x 183 mm**
